Balanced 3-point tilt

Features:

- Balanced 3-point tilt mechanism.
- Back reclines 24° from the upright position.
- Seat pan moves downward 3° from the initial position.

Benefits:

Tilt Tension Control

Feature:

- Easy-to-reach and easy-to-activate side-mounted tilt tension control regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

Benefit:

- Personalized support to accommodate users of different body types and different work styles.

Seat Height Adjustment

Features:

- Pneumatic seat height adjustment.
- Task chair seat height adjusts 5”(127mm) from 16” to 21”(406mm to 533mm) in standard models. Low-position adjusts 14.7” to 18”(373 to 457mm).
- Task stool seat height adjusts 7.3”(185mm) from 21” to 28.3”(533mm to 719mm).
- Dual Posture seat height adjusts 17.5” to 24.2”(445mm to 615mm).

General Specifications

General Guidelines for Product Specification

Zody seating specification numbers are based on an alpha-numeric logic that identifies a product by model and certain characteristics.

For example, a product number that reads **SZT-20-702MA5** identifies the product as a Zody mesh back chair with 4D arms, no lumbar, pneumatic seat height adjustment, foam adjustable seat and standard plastic base TR-F black only with hard casters. The numeric logic for this model with fabric and finish codes is shown below:

Mesh Back

There are exceptions to this logic; therefore, always refer to the price charts for product numbers rather than attempting to construct them. Product number modification instructions for additional options appear in footnoted copy for each applicable model.

Beyond the printed product number, fabric and finish codes are required to complete an order specification. To communicate your order clearly, list the product number and fabric/finish codes in the sequence outlined on each price page.

General Specifications

STANDARD MOBILITY AND ADJUSTABILITY

Balanced 3-point tilt

Features:

- Balanced 3-point tilt mechanism.
- Back reclines 24° from the upright position.
- Seat pan moves downward 3° from the initial position.

Benefits:

- Comfortable relaxed posture.
- Recline allows for the opening of the users’ chest cavity providing good airflow to promote alertness.
- Users’ feet remain flat.

Tilt Tension Control

Feature:

- Easy-to-reach and easy-to-activate side-mounted tilt tension control regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

Benefit:

- Personalized support to accommodate users of different body types and different work styles.

Seat Height Adjustment

Features:

- Pneumatic seat height adjustment.
- Task chair seat height adjusts 5”(127mm) from 16” to 21”(406mm to 533mm) in standard models. Low-position adjusts 14” to 17”(356 to 432mm).
- Task stool seat height adjusts 7.5”(191mm) from 21.5” to 29”(546mm to 737mm).

Benefits:

- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.
- Accommodates for users between approximately 4’11”(1499mm) and 6’3”(1905mm) tall to provide good leg circulation.
- Seat height adjustment also is important in setting the proper hand position and allowing for a proper sitting eye height.

Seat Depth Adjustment

Features:

- 3”(76mm) of seat depth range. (Fixed seat also available.)
- Available with conventional foam material or optional Technogel® Soft Lite gel insert.
- Waterfall edge.

Benefit:

- Supports the thighs, allows users to rest against the seat back for back support, and avoids pressure on the back of the knees of small to tall users.

Upper Back Torsional Movement

Feature:

- Passive 2”(51mm) of torsional flex in the upper back.
- Patented mesh with built in tension zones for added comfort.

Benefit:

- Increases users’ mobility and comfort when reaching sideways for objects.

PAL Back System**Features:**

- PAL Back System includes Asymmetrical Lumbar Adjustment and passive pelvic support.
- Asymmetrical Lumbar Adjustment adjusts 4"(102mm) in height; support level can be adjusted independently for right or left-hand side of users' body.
- Passive pelvic support.

Benefits:

- Lumbar adjustment maintains the natural curvature of the spine at the lower back and allows users to choose the support that feels right for them.
- Passive pelvic support rotates the pelvis forward to maintain the natural spine shape.

4D Arm**Features:**

- Optional 4D arm.
- Arm adjusts in 4 ways:
 - Height adjustment: 4"(102mm)

 - Front-to-back adjustment range: 3.5"(89mm)
 - Pivoting: In 20°; out 20°

Benefits:

- Arms support the muscular system of users' neck and shoulders and proper arm support provides back relief. Arms can be an aid in standing or sitting down.
- Height adjustment accommodates for users with varying elbow rest heights so that users avoid lifting their shoulders or leaning sideways to get arm support.
- Front-to-back adjustment adjusts the armrest length, which is important because it allows users to get close to the worksurface while maintaining the effective use of the backrest.
- Side-to-side adjustment ensures a comfortable resting position for the arms with proper support of the forearm while allowing for easy entry/exit of the chair.
- Pivoting provides proper support of the forearm when performing tasks involving keying and mousing.

STANDARD MOBILITY AND ADJUSTABILITY

Balanced 3-point tilt

Features:

- Balanced 3-point tilt mechanism.
- Back reclines 20° from the upright position.
- Seat pan moves downward 3° from the initial position.
- 2:1 recline ratio.

Benefits:

- Comfortable relaxed posture.
- Recline allows for the opening of the users’ chest cavity providing good airflow to promote alertness.
- Users’ feet remain flat on the floor.

Tilt Tension Control

Feature:

- Easy-to-reach and easy-to-activate side-mounted unlimited tilt tension control regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

Benefit:

- Personalized support to accommodate users of different body types and different work styles.

Seat Height Adjustment

Features:

- Pneumatic seat height adjustment.
- Seat height adjusts 5”(127mm) from 16” to 21”(406mm to 533mm) in standard models. Low-position adjusts 14” to 17”(356 to 432mm).

Benefits:

- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.
- Seat height adjustment also is important in setting the proper hand position and allowing for a proper sitting eye height.

Seat Depth Adjustment

Features:

- 3”(76mm) of seat depth range.

Benefit:

- Supports the thighs, allows users to rest against the seat back for back support, and avoids pressure on the back of the knees of small to tall users.

Seat Depth Adjustment

Feature:

- Optional seat depth has 2.5"(64mm) seat depth range. Fixed seat also available.

COM & COL General Information	<p>To order a COM fabric (Customer’s Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.</p> <p>COM fabrics are placed into Grades based on the cost per linear yard. If a fabric’s cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth’s purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.</p> <p>COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. Environmental Factors	<p><u>Material Off Gassing</u></p> <p>In an effort to ensure air quality standards, all Improv parts suppliers are required to provide Material Data Sheets and/or other documentation, verifying that their products do not emit volatile organic compounds (VOCs). In addition, the powder-coat paint process used in the manufacturing of Improv seating is free of VOCs. Our manufacturing processes have also eliminated all use of chlorofluorocarbons (CFCs) and ozone depleting chemicals (ODCs) in the chair’s construction.</p> <p><u>Recycling</u></p> <p>All fabric scraps are recycled, reducing the amount of material sent to landfills, and all chair components disassemble easily to increase the potential for recycling. In addition, all thermo-plastic parts are 100% reprocessable, and all raw materials used in its manufacturing can be recycled at the end of the useful life of the product. Recyclable parts are identified with the recycle symbol where practical.</p>

Improv Series
General Specifications

General Guidelines for
Product Specification

Improv Series seating specification numbers are based on an alpha-numeric logic that identifies a product by model and certain characteristics.

For example, a product number that reads **M221-2241** identifies the product as an Improv high-back chair with seamless upholstered outer shell, pneumatic seat height adjustment, upholstered arms, back-lock, and hard dual-wheel casters.

The alpha-numeric logic for this model complete with fabric and finish codes is shown below:

A ninth-digit suffix of the product number will indicate functional option, such as -F for CAL 133 option.

There are exceptions to this logic; therefore, always refer to the price charts for product numbers rather than attempting to construct them. Product number modification instructions for additional options appear in footnoted copy for each applicable model.

Beyond the printed product number, fabric and finish codes are required to complete an order specification. To communicate your order clearly, list the product number and fabric/finish codes in the sequence outlined on each price page.

Finishes and Fabrics

A complete listing of finishes and fabrics for Improv Series desk chairs can be found in the back of the price list.

Use the following guidelines when specifying and ordering Improv seating for tandem configurations:

1) Specify the desired chair models from pages 199-202.

• All chair models are designed to accept chair-to-chair connecting bars.

NOTE: It is not necessary to order ganging chair models to create a tandem configuration.

2) Specify chair-to-chair connecting bars from page 204.

• One set of connecting bars will join two chairs in tandem.

Specification Example

The following example illustrates a tandem seating configuration.

Item	Qty	Number	Description
1	3	M600-2210	Leg-Base Arm Chairs
2	2	MPRV-BARS	Chair-to-Chair Connecting Bars

Calculating Tandem Seating Dimensions

Environmental Factors

Material Off Gassing

In an effort to ensure air quality standards, all X99 parts suppliers are required to provide Material Data Sheets and/or other documentation, verifying their products do not emit volatile organic compounds (VOC). In addition, the powder-coat paint process used in the manufacturing of X99 seating is free of VOCs. Our manufacturing processes have also eliminated all use of chlorofluorocarbons (CFCs) and ozone depleting chemicals (ODCs) in the chair's construction.

Recycling

All X99 seating fabric scraps are recycled, reducing the amount of material sent to landfills, and all chair components disassemble easily to increase the potential for recycling. In addition, all thermo-plastic parts are 100% reprocessible, and all raw materials used in its manufacturing can be recycled at the end of the useful life of the product. Recyclable parts are identified with the recycle symbol where practical.

COM & COL
General Information

To order a COM fabric (Customer's Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces > COM Library to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth+ alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.

COM fabrics are placed into Grades based on the cost per linear yard. If a fabric's cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.

COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. The leather costs will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the leather).

General Specifications

Features and Options	<p>Guest and occasional models feature frames constructed solid hardwood, laminated plywood, laminated hardwood core and premium veneers, or rigid polyurethane.</p> <p>Office seating models feature an inner frame construction of tubular steel or solid hardwood or laminated plywood or molded plywood. Swivel bases are standard with hard dual-wheel casters.</p> <p>Exposed wood surfaces are finished with two top coats of pre-catalyst nitrocellulose lacquer for a durable finish.</p> <p>Refer to the appropriate seating model for applicable features and options.</p>
COM & COL General Information	<p>To order a COM fabric (Customer's Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces > COM Library to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth + alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.</p> <p>COM fabrics are placed into Grades based on the cost per linear yard. If a fabric's cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.</p> <p>COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. The leather costs will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the leather).</p>
General Guidelines for Product Specification	<p>Seating specification numbers are based on a numeric logic that identifies a product by model and certain characteristics.</p> <p>For instance, a product number that reads SAS-22-A1A identifies the product as a Candor Modern Seating with fully upholstered seat and back.</p> <p>The numeric logic for this model with finish codes is shown below:</p> <div><div><div>SAS-22 -</div><div>A1A ,</div><div>3A-06 ,</div><div>3A-06 ,</div><div>M3-CA1</div></div><div><div>Candor Modern Chair</div><div>Fully Upholstered Seat and Back</div><div>Tellure - Nickel Seat Fabric</div><div>Tellure - Nickel Back Fabric</div><div>Beech - Amber on Beech</div></div></div> <p>A ninth-digit suffix of the product code will indicate functional options, such as -F for CAL 133 option. There are exceptions to this logic; therefore, always refer to the price charts for product numbers rather than attempting to construct them. Product number modification instructions for additional options appear in footnoted copy for each applicable model.</p> <p>Beyond the printed product number, fabric and finish codes are required to complete an order specification. To communicate your order clearly, list the product number and finish codes in the sequence outlined on each price page.</p>
Finishes and Fabrics	<p>A complete listing of finishes/fabrics can be found in the back of the price list.</p>

Fabrics and Finishes	<p>A complete listing of fabrics and finishes for Riverbend and Pebble is available in the back of the price list. Fabric is applied Railroaded to both Riverbend and Pebble products. Linear or patterned fabric is not recommended due to the manner in which fabric is applied. Material will not be pattern matched.</p> <p>Riverbend sofas and Pebble ottomans feature large, flat surfaces, and textile crispness will be influenced by the amount of stretch in each textile. Riverbend and Pebble

Seam Options

No Horizontal Seam

Horizontal Seam

Riverbend units are available with and without a double-needle stitch horizontal seam.

When specified without horizontal seams, textiles will gently flow over the front and back edges of the seat and back, providing a simple and seamless aesthetic.

For a tailored aesthetic, Riverbend units can be specified with a horizontal seam along the front and back edges of the seat and back.

Ganging Bracket

Ganging brackets are used to gang one Riverbend component to another. When not in use the ganging bracket pivots to hide under the seat. Each Ganging Bracket Kit includes two brackets, screws, a template and assembly instructions. One kit will gang two sofas together.

Power Module

The separately specified power module provides under seat power consisting of either one or two simplex outlets (NEMA-5-15R) and one dual USB port. The Power Module must be installed along the front edge of the Riverbend seat. Power Modules may not be daisy chained together.

The Power Module is available either corded or hardwire with a 6' or 12' cord.

Included with the module are two cord management clips and attachment hardware.

Application may require approval from local authority having jurisdiction (AHJ); ensure compliance before placing orders and installing.

Poppy-At-A-Glance

Designer	Patricia Urquiola
Fabric	Linear or patterned fabric not recommended due to the manner in which the material is applied. Because of the nature of the chair, materials that have more fibers or woolen spun yarn construction, such as Cotswold, tend to upholster well on Poppy. Synthetic fibers, or textiles with heavy back coatings, tend to be more difficult to upholster and consequently may restrict some COMs.

Seating COM Pattern Repeat Information

Haworth will calculate and order COM yardage as needed for seating; however, for bid/quote purposes, please refer to the COM yardage requirements listed by each chair model. These numbers are based on solid or very small scale (under 1" repeat) fabrics.

For fabrics with repeats listed below, additional yardage should be included in your calculations. The additional yardage allows for matching of patterns on the seating.

REPEAT SIZE	ADD ADDITIONAL YARDAGE TO YOUR CALCULATIONS
1"-4"	Add 5%
5"-7"	Add 10%
8"-14"	Add 20%
15"-19"	Add 25%
20"-27"	Add 30%
28"-36"	Add 50%

COM Yardage Requirements

Procedure

To determine if a COM fabric has been approved for use on Haworth product, contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to [Haworth.com/surfaces](https://www.haworth.com/surfaces) > COM Library. Haworth will calculate and order fabric unless instructed otherwise. If the dealer is to provide the fabric, they will calculate the yardage needed themselves.

If the fabric is approved, and the directional orientation (directional rightway, directional railroad, or non-directional) of the tested fabric has been confirmed, then refer to the appropriate price page for yardage requirements.

COM Fabric Requirements

The fabric yardage requirements for COMs given for each model are in lineal yards and are based on 54”(1372mm) usable fabric widths. Approximate yardage requirements are shown for each model within the price pages.

For fabrics already approved, with a COM order entry code assigned, Haworth will determine and purchase the yardage needed. If the fabric will be provided by the dealer, and the pattern has a large repeat or stripes, additional yardage will be needed; see the COM Yardage Requirements at the end of this price guide OR contact the COM Department for more information.

COL Leather Requirements

The leather requirements for COL (Customer’s Own Leather) will vary depending on the hide size and are based on square footage. Haworth will determine and purchase the leather needed.

Find total number of linear yards required for the order. Add the appropriate percentage shown below to the total yardage to accommodate fabric flaws, wrinkles and other imperfections.

- | | |
|----------------------|---------|
| Up to 500 yards | Add 10% |
| 501 to 1000 yards | Add 5% |
| More than 1000 yards | Add 3% |

- Seat height adjustment is important in setting the proper hand position and allowing for proper sitting eye height as well.

Seat Depth Adjustment

Feature:

- 3:1 recline ratio.

Benefits:

- Comfortable relaxed posture.
- Recline allows for the opening of the user's chest cavity providing good airflow to promote alertness.

STANDARD MOBILITY AND ADJUSTABILITY

Lumbar

Features:

- Height adjustable lumbar.
- Range of 2.5”(64mm) of height adjustment.
